

Automation & Metering Solutions

Products presentation

Products portfolio

CDV15

Site flow computer for gas

T, PT, PTZ **3**

Differential pressure devices **4**

STA15

Remote terminal unit

GSM
PSTN
RADIO
OPTICAL
FIBER

ESD12

Static pressure recorder

LOG15

Data Logger

HGC303

Chromatograph for natural gas

PES 15

Package energy

CDN12

Flow computer

1 Truck loading

2 Pipe

3 Volumetric counters
Turbine meters

4 Differential pressure devices

5 Prover

6 Concentrator

7 Alcohol

CDV15 Flow Computer

- Custody transfer flow computer for gas applications
- Volume, mass and energy gas metering
- Suitable for hazardous area
- All type of primary heads (DP, turbine, ultrasonic)
- All type of correction : T, PT, PTZ

Remote Terminal Unit STA15

- Application for Gas Transport and Gas Distribution
- Low power consumption
- Data acquisition & wireless transmission
- Energy metering
- Scada
- Supervision

ESD12 static pressure recorder

- Pressure recording
- Pressure indication
- Network analyzing
- Smart recording
- High data storage capacity

Data Logger LOG15

- Data configuration and exploitation
- Smart interface and user friendly system
- High storage capacity
- High accuracy
- Open system
- Low power consumption
- Intrinsically safe

CDN12 Flow computer Gas & Liquid applications

- Control room flow computer
- High accuracy device
- Open system: 5 communication ports
- Safe data storage
- User friendly

Chromatograph HGC 303

- Analysis of natural gas (up to 11 components)
- Gas quality control
- Compact and user friendly device
- Open system :Multi media & multi protocol communication
- Hazardous area
- Low maintenance cost
- High accuracy measurement
- Part of energy metering package

Energy metering unit PES15

- Ready-to-use energy metering unit
- Control the gas quality
- Custody transfer approved for natural gas metering
- Secured data logging
- Installation in hazardous area
